

The Seed Exchange

Sequence and scientific reading

Name: _____

Date: _____

READ OR LISTEN

Ravi's class grew beans in recycled cups. Each student planted two seeds, watered them lightly, and put the cups near a window. After seven days, many seedlings had green leaves. Some cups were still bare. The teacher explained that seeds do not always sprout at the same time. The class kept observing and recorded changes in a chart.

Read. Choose the answer supported by the passage.

1. Where were the cups placed?

- ☐ near a window
- ☐ in a cupboard
- ☐ outside a gate

2. What happened after seven days?

- ☐ All cups broke.
- ☐ No leaves appeared.
- ☐ Many seeds sprouted.

3. Why did some cups remain bare?

- ☐ The teacher took the beans.
- ☐ Seeds sprout at different times.
- ☐ The class forgot the cups.

4. What did the class use to record changes?

- ☐ a chart
- ☐ a song
- ☐ a map

TRY NEXT: Keep a seven-day observation journal for a seed.
